### DETAILED ACTION

Due to the complex nature of the claims, no request for an oral election is being made. Please see MPEP 812.01.

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 15-22 are drawn to a method of treating or ameliorating a disorder responsive to the induction of apoptosis in an animal suffering therefrom comprising administering to an animal in need of such treatment an effective amount of a compound of Formulae I or II, classified in class 514, subclass 630+.
- II. Claims 7-9 are drawn to a method for treating or ameliorating cancer comprising administering to an animal in need of such treatment an effective amount of a compound of formula I, classified in class 514, subclass 630+.
- III. Claims 10-14 are drawn to a method for the treatment or amelioration of drug-resistant cancer comprising administering to an animal in need of such treatment or amelioration an effective amount of a compound of the formula I, classified in class 514, subclass 630+.
- IV. Claims 23-26 are drawn to a pharmaceutical composition comprising a pharmaceutically acceptable carrier and a compound of formula I, classified in class 514, subclass 630+.

Art Unit: 1614

- V. Claims 27-33 are drawn to a compound of formula I, classified in class 544, various subclasses.

The inventions are distinct, each from the other because of the following reasons:

Inventions V and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case, the product as claimed can be used in a materially different process of using that product.

The five inventions are independent and distinct, each from the other as they have a separate status in the art as shown by their different and separate subject matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

The applicants are required to elect a single invention for examination purposes.

If the applicants elect Group I, claims 1-6 and 15-22, they must also elect between formulae I or II; and then elect from claims 15-22, one disorder.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
